Hi Robert,

I wanted to write you formally to express my thanks for your professionalism, prompt service, and attention to detail. It was important that the topping selected for the 1100 ft² area of radiant tubing placed on the wood subfloor would provide me with efficient and long-term performance. The fact the DAROTopp® provides a completely level floor with high conductivity and of course no cracks or joints made my decision simple in using this in my Mississauga residence.

Your team delivered as promised and I hope to do business with you again in the near future. Bernd was a good leader on-site and offered the correct solutions to our existing and potential problems.

Thank you and kind regards,
Tom Graungaard.
