To Whom It May Concern:

Recently I had decided to renovate my basement. However, I discovered that my basement floor was a total disaster by this I mean that the floor was un-even. I had intention to install a hard wood floor on one section of the room and ceramic tills in the other section a total area of 900 sq fit. The floor was un-even in every direction it varied from the highest point to the lowest point by 4" four inches.

I had contacted all kinds of contractors and no one was able to level the floor one 100%, and than finally I was, referred to Lafarge a concrete supplier. In my conversation with Lafarge was the solution for this problem.

Lafarge assured me that someone from DARO TOPP will contact me, and rest assured I received a call from DARO TOPP. Mr. Gene Latour from Daro Topp called me, and a meeting was quickly arraigned. The presentation by Mr. Latour was out standing. "Finally the solution that I was looking for", the information was well informed and very detailed. I now knew the floor well be 100% level.

I highly recommend DARO TOPP and there product is outstanding as well as there serves and professionalism to any one. As there slogan is.

....Do it once !!!Do it right !!!

I know have a floor that is 100% level

Yours truly,

Jim Daikos
