

DAROTopp® Synthetic Topping Projects

www.trancels.com

Cassie Campbell Arena - Brampton

Project Highlights

- New construction project with concrete slab-on-grade on main level
- **DAROTopp®** installed 50mm - 65mm in six rooms - area of approx 5,000 ft.²
- **DAROTopp®** selected based on overall **performance**; addressing the need for a completely level/smooth surface with **no** control joints or saw cuts required. No surface preparation is required as a slip-sheet is always used as a bond-breaker.

Cassie Campbell Arena , June 2008

- **DAROTopp®** installed on slipsheet to level concrete floor in arena changerooms and washrooms
- Owner: City of Brampton
- Contractor: PCL Constructors
- Architect:
- Applicator: Belmont Concrete/DARO Flooring
